

The Solution to Incontinence Care

What Are The Requirements To Qualify For Incontinence Supplies?

Children Need:

- ✓ To be aged 3+ and have incontinence, or are not potty trained, due to an underlying medical condition (such as Autism, Down Syndrome, etc.)
- ✓ A signed letter of medical necessity or prescription from their pediatrician within the last 12 months.
- ✓ An accurate record of diagnostic information pertaining to the underlying condition, as well as to any other medical diagnoses.
- ✓ The number of times per day their pediatrician has ordered the incontinence supplies to be used.
- ✓ The number of disposable incontinence supplies requested per month.
- ✓ The maximum authorization to receive up to three months of products at a time with updated clinical notes.

Adults Need:

- ✓ A Medicaid or other accepted insurance plan.
- ✓ A prescription for incontinence from a healthcare provider.
- ✓ An underlying medical condition or diagnosis that causes incontinence, such as Parkinson's Disease, ADHD, Autism, spinal cord injury, etc.

Incontinence Conditions

Incontinence is often associated with specific medical conditions, but its impact extends far beyond diagnoses, affecting individuals undergoing significant life changes such as postpartum experiences and the natural process of aging.

Below we identified the top diagnoses that have been associated with the incidence of incontinence.

Children:

- Autism
- Pervasive Developmental Disorder
- ADHD
- Overactive Bladder (OAB)
- Down Syndrome

Adults:

- Diabetes
- Hypertension
- Overactive Bladder (OAB)
- Respiratory System Diseases
- Cognitive Decline (Alzheimer's, Dementia)
- Obesity

How Aeroflow Urology Works

Free incontinence supplies and support for the patients you care about.

Disposable pull-ons, briefs, and other bladder control supplies are items of necessity for individuals living with incontinence. However, these products can be very expensive, and the lack of accessibility to affordable incontinence products hinders those with loss of bladder control from leading healthy, fulfilling lives.

For individuals on Medicaid:

70% have reported that they have struggled to afford incontinence supplies.

43% have had to use incontinence supplies for an extended amount of time in order to reduce the number of products they are having to purchase.

Aeroflow Urology is committed to helping individuals across the United States receive their incontinence products at no cost through their Medicaid policy.

Our Continence Care Specialists will work with your patients to find the best product for their specific needs, and provide them with samples to ensure we get it right!

Products Just For Your Patients

At Aeroflow Urology, we proudly offer our customers high-quality products of their brand choice that they can receive at no cost through their insurance plan.

Pediatric and Youth Products

- ✓ **Diapers:** Diapers include two tabs that allow for easy changing, especially for children with limited mobility. The tear-away sides provide a more hygienic removal.
- ✓ **Pull-Ons:** Pull-ons are available in both pediatric and youth sizes, are a great transitional product for children with incontinence.

Adult Products

- ✓ **Bladder Control Pads:** Ideal for women experiencing light bladder leakage due to activities such as laughing, sneezing, coughing, or exercising.
- ✓ **Male Guards:** Male Guards are liners designed specifically for the male anatomy, with a higher ridge in front to trap leakage as soon as it happens.
- ✓ **Protective Underwear:** Protective underwear, also called pull-ons, are an incontinence product with cloth like fabric that resembles typical underwear.
- ✓ **Adult Diapers:** Adult diapers, also called disposable briefs, are optimal for individuals that experience heavy urinary or bowel incontinence.

The Aeroflow Urology Process

- 1 Submit Your Information**
Submit you or your loved one's details through our Eligibility Form. Once submitted, we'll quickly verify your insurance coverage.
- 2 Visit Your Doctor**
Schedule an appointment with a doctor to obtain an updated or new prescription for incontinence products.
