When Doctors Fail Caregivers, Patients Pay the Price

Left in the Dark

9 *in* 10

caregivers wish their doctors provided resources, training, and guidance.

Tired

Stressed

"Healthcare providers need to proactively address incontinence care to prevent

avoidable patient complications."

— Aleece Fosnight

Medical Advisor, MSPAS, PA-C, CSC-S, CSE, NCMP, IF, HAES

When caregivers are left *unsupported,*

↓

patient health *plummets.*

The data confirms it:

57% of individuals have suffered severe preventable medical complications simply because there wasn't

enough care to go around.

When healthcare networks fail to equip caregivers,

patients pay the *ultimate price.*
